

Publications (without W. K.)

1. Y. Shin:
Determination of the equation of state of a polarized Fermi gas at unitarity.
Phys. Rev. A **77**, 041603(R) (2008).
2. M.W. Zwiernik:
Hochtemperatur-Supraflüssigkeit in ultrakaltem Fermi-Gas
Physik in Unserer Zeit **36**, 206 (2005).
3. A.P. Chikkatur:
Bose-Einstein condensation.
in: *Precision Spectroscopy of Atoms, Molecules, and Bose Condensates.*
Edited by B.P. Das and V. Natarajan (Allied Publishers Private Ltd. New Dehli, 2005).
4. D. Schneble:
Recent Experiments with Ultracold Quantum-Degenerate Atomic Gases.
Physica Scripta **112**, 48-51 (2004).
5. S. Gupta, K. Dieckmann, Z. Hadzibabic and D. E. Pritchard:
Contrast Interferometry using Bose-Einstein Condensates to Measure h/m and a
Phys. Rev. Lett. **89**, 140401 (2002).
6. S. Gupta, A.E. Leanhardt, A.D. Cronin, and D.E. Pritchard:
Coherent manipulation of atoms with standing light waves.
Compte rendus de l'académie des sciences, Série IV - Physique Astrophysique, vol. 2,
pp. 479-495 (2001).
7. A. Görlitz and T. Pfau:
Ein Verstärker für Materie- und Lichtwellen.
Phys. Blätt. **57**, 55 (2001).
8. J. Stenger:
Bragg spectroscopy and superradiant Rayleigh scattering in a Bose-Einstein condensate.
(Article is identical to the Appl. Phys. B paper).
in: Laser Spectroscopy XIV, eds. R. Blatt, J. Eschner, D. Leibfried, F. Schmidt-Kaler
(World Scientific, Singapore, 1999), pp. 90-99.
9. M. Naraschewski and D.M. Stamper-Kurn:
Analytical description of a trapped semi-ideal Bose gas at finite temperature.
Phys. Rev. A **58**, 2423 (1998).
10. H. Wallis, A. Röhrl, M. Naraschewski, A. Schenzle, and H.-J. Miesner:
Coherence of Bose Condensates.
J. Mod. Optics **44**, 1751 (1997).
